The Aeronautical Journal of the Royal Aeronautical Society

VOLUME XCIX

JANUARY–DECEMBER 1995

SUBJECT INDEX

AERODYNAMICS

A note on the interpretation of mini-tuft photographs, D.G. Mabey, B.L. Welsh and C.R. Pyne, pp 178-182.

An overview of the Boeing 777 high lift aerodynamic design, B.N. Nield, pp 361-371.

Collectively variable incidence wingtips for lift control and reduced gust sensitivity, R.H. Barnard, pp 29-35.

ONERA activities on high-lift devices for transport aircraft, J.J. Thibert, J. Reneaux, F. Moens, J. Priest, pp 395-411.

Preliminary results from a particle image velocimetry study of blade–vortex interaction, M.B. Horner, J.N. Stewart, R.A.McD. Galbraith, I. Grant, F.N. Cotton and H.H. Smith, pp 91-98.

Pressure measurements on a half delta wing oscillating in pitch, J.P. Vaughan and N.J. Wood, pp 432-438.

The NASA B737-100 high lift research programme — measurements and computations, L.P. Yip, C.P. van Dam, J.H. Whitehead, J.D. Hardin, S.J. Miley, R.C. Potter, A. Bertelrud, D.C. Edge and P.E. Willard, pp 372-386.

The verification of a theoretical helicopter rotor blade sailing method by means of windtunnel testing, S.J. Newman, pp 41-51.

Unsteady aerodynamic effects of trailing edge controls on delta wings, D.J. Pilkington and N.J. Wood, pp 99-108.

AEROELASTICITY

Buffeting tests in a cryogenic windtunnel, D.G. Mabey, R.P. Boyden and W.G. Johnson, pp 1-14.

Unsteady aerodynamic loads on an aerofoil with deflecting tab, J.P. Narkiewicz, A. Ling and G.T.S. Done, pp 282-292.

AEROFOILS

A comparison of central-difference and upwind-biased schemes for steady and unsteady Euler aerofoil computations, C.B. Allen, pp 52-62.

AIRCRAFT OPERATIONS

An investigation of piloting strategies for engine failures during takeoff from offshore platforms, D.G. Thomson, C.D. Taylor, N. Talbot, R. Ablett and R. Bradley, pp 15-25.

Autonomous helicopter hover positioning by optical tracking, G. Bouwer, C-H. Oertel and W. von Grünhagen, pp 145-149.

Optimal takeoff performance of a vectored thrust aircraft, G. Avanzini and G. de Matteis, pp 275-281.

AVIONICS

Autonomous helicopter hover positioning by optical tracking, G. Bouwer, C-H. Oertel and W. von Grünhagen, pp 145-149.

BOOK REVIEWS — BY AUTHOR

Weatherill, N.P. *et al*, Multiblock Grid Generation: Results of the EC/BRITE EURAM EUROMESH, 1990–1992, pp 75-76.

BOOK REVIEWS — BY TITLE

Advanced Metallics, Metal-matrix and Polymer-Matrix Composites, A.K. Noor and S.L. Venneri (Eds), p 458.

Advances in Engine Technology, R. Dunker, p 458.

An introduction to the Flight Dynamics of Rigid Airplanes, G.J. Hancock, p 197.

Computational Aeronautical Fluid Dynamics, L. Fezoui *et al* (Eds), p 75.

Concise Encyclopedia of Composite Materials, A. Kelly (Ed), p 36.
Control of Spacecraft and Aircraft, A.E. Bryson, p 76.
Development and Validation of a Computer-Assisted Design Methodology for Gas-Turbine-Based Aircraft Engines, K.E. Shahroudi, p 412.
Dynamic Fracture Mechanics, M.H. Aliabadi (Ed), p 313.
Flight Vehicle Materials, Structures and Dynamics Series, Vol. 2, A.K. Noor and S.L. Venneri, (Eds) pp 458.
Fracture Mechanics: Fundamentals and Applications — Second edition, T.L. Anderson, p 352.
High Performance Materials in Aerospace, H.M. Flower (Ed), p 352.
Hypersonic Aerothermodynamics, J.J. Bertin, p 36.
Hypersonic Airbreathing Propulsion, W.H. Heiser and D.T. Pratt, p 260.
Metals and Materials: Sciences, Processes, Applications, R.E. Smallman and R.J. Bishop, p 412.
Multiblock Grid Generation: Results of the EC/BRITE EURAM EUROMESH, 1990–1992, N.P. Weatherill *et al*, pp 75-76.
New and Projected Aeronautical and Space Systems, Design Concepts and Loads, A.K. Noor and S.L. Venneri (Eds), pp 313-314.
Properties of Engineering Materials — Second edition, R.A. Higgins, p 260.
Radar Target Characteristics: Measurement and Applications, L.Yu. Astanin *et al*, p 36.
Robust Multivariable Flight Control, R.J. Adams, J.M. Buffington, A.G. Sparks and S.S. Banda, p 260.
The Atmospheric Boundary Layer for Engineers, R.S. Azad, p 197.
Woven Fabric Composites, N.K. Naik, p 313.
The Finite Element Method for Engineers — Third edition, K.H. Huebner, E.A. Thorton and E.G. Byrom, p 412.
Thermodynamics, Combustion and Engines, B.E. Milton, p 458.
Growth of a three dimensional wall jet, p 423.

BOUNDARY LAYERS

Absolute and convective instabilities in separation bubbles, T. Allen and N. Riley, pp 439-449.
A study of the three-dimensional interaction of wakes and boundary layers, C.P. Yeung and L.C. Squire, pp 343-351.
Effect of spherical roughness elements on the transition of a 3-D boundary layer, M.Ö. Çarpìnlìoglu and Ö.T. Göksel, pp 26-28.
Improvements in the performance of a three element high lift system by the application of airjet vortex generators, F. Innes, H.H. Pearcey and D.M. Sykes, pp 265-274.
Modelling the formation and dispersal of streamwise vortices in turbulent flow, B.E. Launder, pp 419-431.
Modelling 2D separation from a high lift aerofoil with a non linear eddy-viscosity model and second-moment closure, F.S. Lien and M.A. Leschziner, pp 125-144.
On the effect of swept-wing–plate junction flow on lift and drag, L. Bernstein and S. Hamid, pp 293-305.

COMPOSITES

Optimum design of composite stiffened panels — a parametric study, R. Butler, pp 169-177.

COMPUTATIONAL FLUID DYNAMICS

Technical Note: A CFD evaluation of three prominent World War II fighter aircraft, D. Lednicer, pp 238-242.
A comparison of central-difference and upwind-biased schemes for steady and unsteady Euler aerofoil computations, C.B. Allen, pp 52-62.
A three-dimensional moving mesh method for the calculation of unsteady transonic flows, A.L. Gaitonde and S.P. Fiddes, pp 150-160.
Modelling 2D separation from a high lift aerofoil with a non linear eddy-viscosity model and second-moment closure, F.S. Lien and M.A. Leschziner, pp 125-144.
Modelling the formation and dispersal of streamwise vortices in turbulent flow, B.E. Launder, pp 419-431.
The NASA B737-100 high lift research programme — measurements and computations, L.P. Yip, C.P. van Dam, J.H. Whitehead, J.D. Hardin, S.J. Miley, R.C. Potter, A. Bertelrud, D.C. Edge and P.E. Willard, pp 372-386.
Two-dimensional viscous flow past flexible sail sections close to ideal incidence, P.S. Jackson and S.P. Fiddes, pp 217-225.

CRYOGENICS

Buffeting tests in a cryogenic windtunnel, D.G. Mabey, R.P. Boyden and W.G. Johnson, pp 1-14.

DESIGN AND DEVELOPMENT

1994 RAeS Brabazon Lecture: Aeronautical technology — recent advances and future prospects, G.G. Pope, pp 81-89.
The Spacecab Demonstrator project, D.M. Ashford, pp 226-237.
Evolution of the high performance glider, Ann Welch, pp 243-259.

DRAG

Technical Note: A CFD evaluation of three prominent World War II fighter aircraft, D. Lednicer, pp 238-242.
Drag reduction in a rectangular duct using riblets, A.R. Moore and M.V. Lowson, pp 187-193.
Technical Note: Measurement of drag using a momentum balance, L.C. Squire, pp 183-186.
On the induced drag reduction due to propeller–wing interaction, G. Chiocchia and S. Pignataro, pp 328-336.
On the effect of swept-wing–plate junction flow on lift and drag, L. Bernstein and S. Hamid, pp 293-305.
Viscous contribution to the high Mach number damping in pitch of blunt slender cones at small angles of attack, M. Khalid, pp 69-74.

ENGINE–AIRFRAME INTEGRATION

On the effect of swept-wing–plate junction flow on lift and drag, L. Bernstein and S. Hamid, pp 293-305.
On the induced drag reduction due to propeller–wing interaction, G. Chiocchia and S. Pignataro, pp 328-336.
Optimal takeoff performance of a vectored thrust aircraft, G. Avanzini and G. de Matteis, pp 275-281.

FINITE ELEMENT ANALYSIS

Equivalent dynamic beam–rod models of aircraft wing structures, U. Lee, pp 450-457.

FLUID MECHANICS

Aerodynamic characteristics of low-drag bicycle wheels, D.I. Greenwell, N.J. Wood, E.K.L. Bridge and R.J. Addy, pp 109-120.
A note on the interpretation of mini-tuft photographs, D.G. Mabey, B.L. Welsh and C.R. Pyne, pp 178-182.
A study of wall jets resulting from single and multiple inclined jet impingement, P. Miller, pp 201-216.
Drag reduction in a rectangular duct using riblets, A.R. Moore and M.V. Lowson, pp 187-193.
Effect of spherical roughness elements on the transition of a 3-D boundary layer, M.Ö. Çarpìnlìoglu and Ö.T. Göksel, pp 26-28.
Modelling the formation and dispersal of streamwise vortices in turbulent flow, B.E. Launder, pp 419-431.
On the effect of swept-wing–plate junction flow on lift and drag, L. Bernstein and S. Hamid, pp 293-305.
On the induced drag reduction due to propeller–wing interaction, G. Chiocchia and S. Pignataro, pp 328-336.

Optimal takeoff performance of a vectored thrust aircraft, G. Avanzini and G. de Matteis, pp 275-281.
Separation control on highly-swept wings with fixed or variable camber, P.R. Ashill, G.L. Riddle and M.J. Stanley, pp 317-327.
The verification of a theoretical helicopter rotor blade sailing method by means of windtunnel testing, S.J. Newman, pp 41-51.
Viscous contribution to the high Mach number damping in pitch of blunt slender cones at small angles of attack, M. Khalid, pp 69-74.

GLIDERS

Evolution of the high performance glider, Ann Welch, pp 243-259.

HIGH LIFT DEVICES

An overview of the Boeing 777 high lift aerodynamic design, B.N. Nield, pp 361-371.
High lift and separation control, an introductory review paper, A.B. Haines, pp 359-360.
Improvements in the performance of a three element high lift system by the application of airjet vortex generators, F. Innes, H.H. Pearcey and D.M. Sykes, pp 265-274.
ONERA activities on high-lift devices for transport aircraft, J.J. Thibert, J. Reneaux, F. Moens, J. Priest, pp 395-411.
The NASA B737-100 high lift research programme — measurements and computations, L.P. Yip, C.P. van Dam, J.H. Whitehead, J.D. Hardin, S.J. Miley, R.C. Potter, A. Bertelrud, D.C. Edge and P.E. Willard, pp 372-386.
Two-dimensional viscous flow past flexible sail sections close to ideal incidence, P.S. Jackson and S.P. Fiddes, pp 217-225.
Use of maximum lift and angle of attack, a review of experience within BAe Military Aircraft, T. McMichael and K. McKay, pp 387-394.

JETS

A study of wall jets resulting from single and multiple inclined jet impingement, P. Miller, pp 201-216.
Optimal takeoff performance of a vectored thrust aircraft, G. Avanzini and G. de Matteis, pp 275-281.
Turbulent mixing in a free jet issuing from a low aspect ratio contoured rectangular nozzle, W.R. Quinn, pp 337-342.

NON-AIRCRAFT AERODYNAMICS

Aerodynamic characteristics of low-drag bicycle wheels, D.I. Greenwell, N.J. Wood, E.K.L. Bridge and R.J. Addy, pp 109-120.
Optimal load limiting parachute inflation control, J. Redmond, G.G. Parker and T.D. Hinnerichs, pp 306-312.

PARACHUTES

Optimal load limiting parachute inflation control, J. Redmond, G.G. Parker and T.D. Hinnerichs, pp 306-312.

PHOTOGRAPHS

Aircraft

Airbus A320 showing high lift devices deployed, p 85.
Cockpit of Airbus A340, p 86.
Possible configuration for future supersonic transport aircraft, p 86.
Eurofighter 2000, p 87.
X-15, p 227.
Blue Streak as a lower stage, p 228.
X-24A, p 229.
EAP, DC-X, X-34 full scale mockup and X-31, p 230.
Saunders-Roe SR.53, p 230.
Sänger mockup, p 233.
Winged version of V-2 rocket, p 236.
Hermes being launched by Ariane 5, p 237.
777 takes off, p 371.
Tornado variable geometry aircraft, p 388.
The FBW Jaguar, p 389.
The EAP demonstrator aircraft, p 389.
Eurofighter 2000, p 390.

Components

Jaguar wing demonstrator in carbon fibre composite, p 82.
Tornado taileron in carbon fibre composite, p 83.
Cross-section of Trent fan blade, p 84.
Close-up view of instrumented research flaps, p 373.
Lower surface of research flaps, p 373.
Slat instrumentation including hot film belt, p 376.
Rakes on spoiler and fore flap hot film belt, p 376.
IR viewing area and explanation of features in IR image, p 379.
Section of the interior of an RB.211 turbine blade, p 421.

Engines

Nacelle chine, p 367.
Outboard flap VGs, p 369.
Trent engine on test, p 84.

Gliders

The FVA-2 Blaue Maus, p 243.
The vampyr, p 244.
The Darmstadt Akaflieg D-15 "Westpreussen" of 1926, p 244.
The start of the thunderstorm flight by Max Kegel, p 244.
Robert Kronfeld in the cockpit of his Wien, p 245.
The Wien being launched by V-shaped rubber rope, p 245.
Gunther Groenhoff in the cockpit of his Fafnir, p 246.
The cockpit and wing root of Kronfeld's giant 30 m span Austria, p 246.
The Rhonadler being bungey launched, p 247.
The Rhonbuzzard, p 247.
Wolf Hirth's Minimoa, p 248.
The Breguet 901, p 250.
The cockpit of the Polish Standard Class Foka, p 250.
The Glasflugel Standard Libelle of 1967, p 250.
The variable geometry Sigma with and without flaps extended, p 252.
The Nimbus 4, p 252.
Wing surface finish of the Schempp-Hirth Discus, p 254.
Hang glider flying close to its V_{ne}, p 254.
Typical foot launched hang glider landing, p 254.
High performance paraglider turning, p 255.
Paragliders and a hang glider circling in a thermal under a small cumulus, p 255.
The Swift Class 2 rigid wing hang glider foot launching off a hill, p 256.
The World Class Me-7, p 257.
The Silent light glider being aerotowed by a microlight trike, p 258.

Rotorcraft

EH101 — an advanced helicopter with a conventional configuration, p 88.
Westland Lynx with advanced rotor blades, p 88.
Bell/Boeing V-22 Osprey tilt-rotor aircraft, p 88.
Compound helicopter, p 88.

Test results

Surface oil-flow patterns on the plate for the swept-wing–plate junction at $\alpha = 0°$, p 297.
Surface oil-flow patterns on the aerofoil for the swept-wing–plate junction at $\alpha = 0°$, p 297.
Typical "raw" data collected during a BVI. $Y_{wc} = -0{\cdot}2$, $Z_{wc} = 0{\cdot}0$, $\delta = 12{\cdot}5°$, $\psi = 187°$, p 93.

View of downward looking camera, p 148.
Automatic flight above a target, p 148.
A time integrated photograph of the scramjet during test with stagnation enthalpy of 3·0 MJ/kg, freestream Mach number, pressure and temperature of 6·6, 9 kPa and 300K respectively, and a fuel of 13% silane and 87% hydrogen by volume, p 162.
Comparison of (a) single and (b) multiple ultraviolet flash photographs of mini-tufts, p 179.
Growth of a three dimensional wall jet, p 423.

Windtunnel models
Layout of helicopter model, p 42.
Helicopter model installed on ship's deck, p 42.
Ship model installed in 11 ft × 8 ft windtunnel, p 45.
Ship model with seeding and LDA arrangement, p 45.
Model of an A300 in the DRA 5 m windtunnel, p 82.
Wing section mounted between endplates in the T2 windtunnel, p 266.
Section of the model showing plenum chambers, p 267.
The alternative pilot rakes, p 267.
Close up of the model showing the endplate blowing slots and exits for airjets, p 267.
Half model testing, p 364.
Full model testing, p 364.
Variable sweep wing in the F1 windtunnel, p 399.

PROPULSION
Scramjet, thrust measurement in a shock tunnel, A. Paull, R.J. Stalker and D.J. Mee, pp 161-163.
Turbulent mixing in a free jet issuing from a low aspect ratio contoured rectangular nozzle, W.R. Quinn, pp 337-342.

ROTORCRAFT
Autonomous helicopter hover positioning by optical tracking, G. Bouwer, C-H. Oertel and W. von Grünhagen, pp 145-149.
Preliminary results from a particle image velocimetry study of blade–vortex interaction, M.B. Horner, J.N. Stewart, R.A.McD. Galbraith, I. Grant, F.N. Cotton and H.H. Smith, pp 91-98.
The verification of a theoretical helicopter rotor blade sailing method by means of windtunnel testing, S.J. Newman, pp 41-51.

ROYAL AERONAUTICAL SOCIETY LECTURES
1994 RAeS Brabazon Lecture: Aeronautical technology — recent advances and future prospects, G.G. Pope, pp 81-89.
Modelling the formation and dispersal of streamwise vortices in turbulent flow, B.E. Launder, pp 419-431.

ROYAL AERONAUTICAL SOCIETY SYMPOSIA
An overview of the Boeing 777 high lift aerodynamic design, B.N. Nield, pp 361-371.
ONERA activities on high-lift devices for transport aircraft, J.J. Thibert, J. Reneaux, F. Moens, J. Priest, pp 395-411.
Improvements in the performance of a three element high lift system by the application of airjet vortex generators, F. Innes, H.H. Pearcey and D.M. Sykes, pp 265-274.
Separation control on highly-swept wings with fixed or variable camber, P.R. Ashill, G.L. Riddle and M.J. Stanley, pp 317-327.
The NASA B737-100 high lift research programme — measurements and computations, L.P. Yip, C.P. van Dam, J.H. Whitehead, J.D. Hardin, S.J. Miley, R.C. Potter, A. Bertelrud, D.C. Edge and P.E. Willard, pp 372-386.
Use of maximum lift and angle of attack, a review of experience within BAe Military Aircraft, T. McMichael and K. McKay, pp 387-394.

SAFETY
An investigation of piloting strategies for engine failures during takeoff from offshore platforms, D.G. Thomson, C.D. Taylor, N. Talbot, R. Ablett and R. Bradley, pp 15-25.

SEPARATION CONTROL
Absolute and convective instabilities in separation bubbles, T. Allen and N. Riley, pp 439-449.
Buffeting tests in a cryogenic windtunnel, D.G. Mabey, R.P. Boyden and W.G. Johnson, pp 1-14.
Technical Note: Criteria for location of vortex breakdown over delta wings, I. Gursul, pp 194-196.
High lift and separation control, an introductory review paper, A.B. Haines, pp 359-360.
Improvements in the performance of a three element high lift system by the application of airjet vortex generators, F. Innes, H.H. Pearcey and D.M. Sykes, pp 265-274.
Pressure measurements on a half delta wing oscillating in pitch, J.P. Vaughan and N.J. Wood, pp 432-438.
Separation control on highly-swept wings with fixed or variable camber, P.R. Ashill, G.L. Riddle and M.J. Stanley, pp 317-327.
Two-dimensional viscous flow past flexible sail sections close to ideal incidence, P.S. Jackson and S.P. Fiddes, pp 217-225.
Unsteady aerodynamic effects of trailing edge controls on delta wings, D.J. Pilkington and N.J. Wood, pp 99-108.
Unsteady aerodynamic loads on an aerofoil with deflecting tab, J.P. Narkiewicz, A. Ling and G.T.S. Done, pp 282-292.
Use of maximum lift and angle of attack, a review of experience within BAe Military Aircraft, T. McMichael and K. McKay, pp 387-394.

SPACE
Scramjet thrust measurement in a shock tunnel, A. Paull, R.J. Stalker and D.J. Mee, pp 161-163.
The Spacecab Demonstrator project, D.M. Ashford, pp 226-237.

STABILITY AND CONTROL
Collectively variable incidence wingtips for lift control and reduced gust sensitivity, R.H. Barnard, pp 29-35.
Technical Note: Criteria for location of vortex breakdown over delta wings, I. Gursul, pp 194-196.
Unsteady aerodynamic effects of trailing edge controls on delta wings, D.J. Pilkington and N.J. Wood, pp 99-108.
Unsteady aerodynamic loads on an aerofoil with deflecting tab, J.P. Narkiewicz, A. Ling and G.T.S. Done, pp 282-292.

STRUCTURES
Crack growth characteristics of integrally machined stringer–skin panels, J.B. Young and M. Ashfaq Sheikh, pp 63-68.
Equivalent dynamic beam–rod models of aircraft wing structures, U. Lee, pp 450-457.
Optimum design of composite stiffened panels — a parametric study, R. Butler, pp 169-177.

SUPERSONIC FLOWS
Scramjet thrust measurement in a shock tunnel, A. Paull, R.J. Stalker and D.J. Mee, pp 161-163.
Viscous contribution to the high Mach number damping in pitch of blunt slender cones at small angles of attack, M. Khalid, pp 69-74.

TRANSONIC FLOWS
A three-dimensional moving mesh method for the calculation of unsteady transonic flows, A.L. Gaitonde and S.P. Fiddes, pp 150-160.

TURBULENCE

Buffeting tests in a cryogenic windtunnel, D.G. Mabey, R.P. Boyden and W.G. Johnson, pp 1-14.

Effect of spherical roughness elements on the transition of a 3-D boundary layer, M.Ö. Çarpìnlioglu and Ö.T. Göksel, pp 26-28.

Modelling 2D separation from a high lift aerofoil with a non linear eddy-viscosity model and second-moment closure, F.S. Lien and M.A. Leschziner, pp 125-144.

Modelling the formation and dispersal of streamwise vortices in turbulent flow, B.E. Launder, pp 419-431.

Turbulent mixing in a free jet issuing from a low aspect ratio contoured rectangular nozzle, W.R. Quinn, pp 337-342.

VORTICES

Modelling the formation and dispersal of streamwise vortices in turbulent flow, B.E. Launder, pp 419-431.

WAKES

A study of the three-dimensional interaction of wakes and boundary layers, C.P. Yeung and L.C. Squire, pp 343-351.

WINDTUNNELS

Technical Note: Measurement of drag using a momentum balance, L.C. Squire, pp 183-186.

Preliminary results from a particle image velocimetry study of blade–vortex interaction, M.B. Horner, J.N. Stewart, R.A.McD. Galbraith, I. Grant, F.N. Cotton and H.H. Smith, pp 91-98.

Author Index

ABLETT, R. THOMSON, D.G., TAYLOR, C.D., TALBOT, N. and BRADLEY, R.
An investigation of piloting strategies for engine failures during takeoff from offshore platforms, pp 15-25.

ADDY, R.J., WOOD, N.J., BRIDGE, E.K.L. and GREENWELL, D.I.
Aerodynamic characteristics of low-drag bicycle wheels, pp 109-120.

ALLEN, C.B.
A comparison of central-difference and upwind-biased schemes for steady and unsteady Euler aerofoil computations, pp 52-62.

ALLEN, T. and RILEY, N.
Absolute and convective instabilities in separation bubbles, pp 439-449.

ASHFAQ SHEIKH, M. and YOUNG, J.B.
Crack growth characteristics of integrally machined stringer–skin panels, pp 63-68.

ASHFORD, D.M.
The Spacecab Demonstrator project, pp 226-237.

ASHILL, P.R., RIDDLE, G.L. and STANLEY, M.J.
Separation control on highly-swept wings with fixed or variable camber, pp 317-327.

AVANZINI, G. and DE MATTEIS, G.
Optimal takeoff performance of a vectored thrust aircraft, pp 275-281.

BARNARD, R.H.
Collectively variable incidence wingtips for lift control and reduced gust sensitivity, pp 29-35.

BERNSTEIN, L. and HAMID, S.
On the effect of swept-wing–plate junction flow on lift and drag, pp 293-305.

BERTELRUD, A., YIP, L.P., VAN DAM, C.P., WHITEHEAD, J.H., HARDIN, J.D., MILEY, S.J., POTTER, R.C., EDGE, D.C. AND WILLARD, P.E.
The NASA B737-100 high lift research programme — measurements and computations, pp 372-386.

BOUWER, G., OERTEL, C-H. and VON GRÜNHAGEN, W.
Autonomous helicopter hover positioning by optical tracking, pp 145-149.

BOYDEN, R.P., MABEY, D.G. and JOHNSON, W.G.
Buffeting tests in a cryogenic windtunnel, pp 1-14.

BRADLEY, R., THOMSON, D.G., TAYLOR, C.D., TALBOT, N. and ABLETT, R.
An investigation of piloting strategies for engine failures during takeoff from offshore platforms, pp 15-25.

BRIDGE, E.K.L., GREENWELL, D.I., WOOD, N.J. and ADDY, R.J.
Aerodynamic characteristics of low-drag bicycle wheels, pp 109-120.

BUTLER, R.
Optimum design of composite stiffened panels — a parametric study, pp 169-177.

ÇARPÌNLÌOGLU, M.Ö. and GÖKSEL, Ö.T.
Effect of spherical roughness elements on the transition of a 3-D boundary layer, pp 26-28.

CHIOCCHIA, G. and PIGNATARO, S.
On the induced drag reduction due to propeller–wing interaction, pp 328-336.

COTTON, F.N., HORNER, M.B., STEWART, J.N., GALBRAITH, R.A.McD., GRANT, I. and SMITH, H.H.
Preliminary results from a particle image velocimetry study of blade–vortex interaction, pp 91-98.

VAN DAM, C.P., YIP, L.P., WHITEHEAD, J.H., HARDIN, J.D., MILEY, S.J., POTTER, R.C., BERTELRUD, A., EDGE, D.C. AND WILLARD, P.E.
The NASA B737-100 high lift research programme — measurements and computations, pp 372-386.

DONE, G.T.S., NARKIEWICZ, J.P. and LING, A.
Unsteady aerodynamic loads on an aerofoil with deflecting tab, pp 282-292.

ONERA activities on high-lift devices for transport aircraft, pp 395-411.

PYNE, C.R., MABEY, D.G. and WELSH, B.L.
A note on the interpretation of mini-tuft photographs, pp 178-182.

QUINN, W.R.
Turbulent mixing in a free jet issuing from a low aspect ratio contoured rectangular nozzle, pp 337-342.

REDMOND, J., PARKER, G.G. and HINNERICHS, T.D.
Optimal load limiting parachute inflation control, pp 306-312.

RENEAUX, J., THIBERT, J.J., MOENS, F. and PRIEST, J.
ONERA activities on high-lift devices for transport aircraft, pp 395-411.

RIDDLE, G.L., ASHILL, P.R. and STANLEY, M.J.
Separation control on highly-swept wings with fixed or variable camber, pp 317-327.

RILEY, N. and ALLEN, T.
Absolute and convective instabilities in separation bubbles, pp 439-449.

SMITH, H.H., HORNER, M.B., STEWART, J.N., GALBRAITH, R.A.McD., COTTON, F.N. and GRANT, I.
Preliminary results from a particle image velocimetry study of blade–vortex interaction, pp 91-98.

SQUIRE, L.C.
Technical Note: Measurement of drag using a momentum balance, pp 183-186.

SQUIRE, L.C. and YEUNG, C.P.
A study of the three-dimensional interaction of wakes and boundary layers, pp 343-351.

STALKER, R.J., PAULL, A. and MEE, D.J.
Scramjet, thrust measurement in a shock tunnel, pp 161-163.

STANLEY, M.J., ASHILL, P.R. and RIDDLE, G.L.
Separation control on highly-swept wings with fixed or variable camber, pp 317-327.

STEWART, J.N., HORNER, M.B., GALBRAITH, R.A.McD., GRANT, I., COTTON, F.N. and SMITH, H.H.
Preliminary results from a particle image velocimetry study of blade–vortex interaction, pp 91-98.

SYKES, D.M., INNES, F. and PEARCEY, H.H.
Improvements in the performance of a three element high lift system by the application of airjet vortex generators, pp 265-274.

TALBOT, N., THOMSON, D.G., TAYLOR, C.D., ABLETT, R. and BRADLEY, R.
An investigation of piloting strategies for engine failures during takeoff from offshore platforms, pp 15-25.

TAYLOR, C.D., THOMSON, D.G., TALBOT, N., ABLETT, R. and BRADLEY, R.
An investigation of piloting strategies for engine failures during takeoff from offshore platforms, pp 15-25.

THIBERT, J.J., RENEAUX, J., MOENS, F. and PRIEST, J.
ONERA activities on high-lift devices for transport aircraft, pp 395-411.

THOMSON, D.G., TAYLOR, C.D., TALBOT, N., ABLETT, R. and BRADLEY, R.
An investigation of piloting strategies for engine failures during takeoff from offshore platforms, pp 15-25.

VAUGHAN J.P. and WOOD, N.J.
Pressure measurements on a half delta wing oscillating in pitch, pp 432-438.

WELSH, B.L., MABEY, D.G. and PYNE, C.R.
A note on the interpretation of mini-tuft photographs, pp 178-182.

WHITEHEAD, J.H., YIP, L.P., VAN DAM, C.P., HARDIN, J.D., MILEY, S.J., POTTER, R.C., BERTELRUD, A., EDGE, D.C. AND WILLARD, P.E.
The NASA B737-100 high lift research programme — measurements and computations, pp 372-386.

WILLARD, P.E., YIP, L.P., VAN DAM, C.P., WHITEHEAD, J.H., HARDIN, J.D., MILEY, S.J., POTTER, R.C., BERTELRUD, A. and EDGE, D.C.
The NASA B737-100 high lift research programme — measurements and computations, pp 372-386.

WOOD, N.J., GREENWELL, D.I., BRIDGE, E.K.L. and ADDY, R.J.
Aerodynamic characteristics of low-drag bicycle wheels, pp 109-120.

WOOD, N.J. and PILKINGTON, D.J.
Unsteady aerodynamic effects of trailing edge controls on delta wings, pp 99-108.

WOOD, N.J. and VAUGHAN J.P.
Pressure measurements on a half delta wing oscillating in pitch, pp 432-438.

YEUNG, C.P. and SQUIRE, L.C.
A study of the three-dimensional interaction of wakes and boundary layers, pp 343-351.

YOUNG, J.B. and ASHFAQ SHEIKH, M.
Crack growth characteristics of integrally machined stringer–skin panels, pp 63-68.

WELCH, ANN
Evolution of the high performance glider, pp 243-259.

YIP, L.P., VAN DAM, C.P., WHITEHEAD, J.H., HARDIN, J.D., MILEY, S.J., POTTER, R.C., BERTELRUD, A., EDGE, D.C. AND WILLARD, P.E.
The NASA B737-100 high lift research programme — measurements and computations, pp 372-386.

The Aeronautical Journal

The editorial staff would like to thank all the referees who provided valuable comments throughout 1995. Those who assisted on papers which reached a conclusion in 1995 are listed below.

R. Adkins
D.J. Allerton
J.C. Allwright
J.A. Bagley
C.J. Baker
P. Bartholomew
P.W. Bearman
E.G. Broadbent
S.L. Buckingham
D.M. Bushnell
I.P. Castro
D.J. Cockrell
G. Coleman
S.F. Colman
M. Cooke
G.A.O. Davies
R. Doganis
G.T.S. Done
M.E. Eshelby
C. Forsey
K.P.L. Fullanger
R.A.McD. Galbraith
L. Gaudet
J.C. Gibbings
M.J. Goodyer
J.M.R. Graham
J.E. Green
G.F. Harrison
C. Hart
R. Hillier
A.N. Hofton
S.S. Houston
D. Ing
G. Inger
J.A. Jupp
S. King
P.G. Knott
K. Knowles
G.M. Lilley
M.A. Leschziner
D.A. Lovell
M.V. Lowson
C.C. Lytton
D.G. Mabey
N.J. Maggs
W.A. Mair
H. Metcalffe
R.H. McKinlay
D. McLean
P. Millar
R.G. Morgan
J.F. Morrison
B.G. Newman
S.J. Newman
C.O. O'Leary
R.C. Parkinson
R.S. Peacock-Edwards
H.H. Pearcey
